**Nano-Clear**®

**BEFORE NANO-CLEAR**

**AFTER NANO-CLEAR**

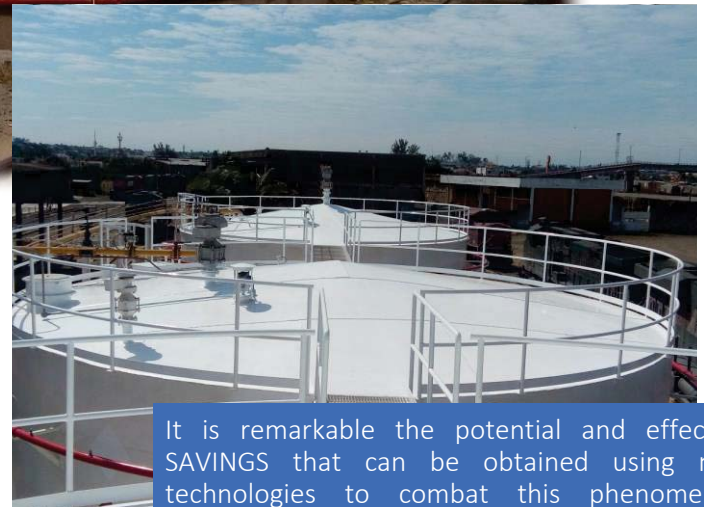

## BEFORE NANO-CLEAR

CORROSION generates high costs for repairs, replacement of assets, unscheduled stoppages, among the sectors most affected are rail transportation.

## AFTER NANO-CLEAR

It is remarkable the potential and effective SAVINGS that can be obtained using new technologies to combat this phenomenon effectively. "NANO-CLEAR your ally to protect your assets and take care of your investment."

## WHAT BENEFITS DO I OBTAIN BY COUNTING WITH THE NANO-CLEAR SYSTEM IN MY ASSETS:

1. Your investment is guaranteed, a new application in the subsequent years (after the protection for 5 years) will be subject to conditions of operation and its previous authorization, since as added value you will obtain inspections and tests on your assets on a regular basis for each year, These tests will be carried out by specialists who determine the state of protection of Nano-Clear, we want you to feel with the full confidence that your investment will always be protected and at no additional cost to you.
2. It is a PREVENTIVE system, which is applied on the damaged and worn coating, ie does not wear to the metal structure, in addition to adding to the coating unique properties such as protection against moisture by repelling water, has a protection Against the harmful attack of the UV rays, the coating will maintain the color to which it was coated in its first investment, added to an extreme chemical protection that would support even cleaning with industrial solvents like thinner, acetone and Mek without suffering any damages, Resistance to weather weathering acid rain, salinity, abrasion.
3. You will get significant economic savings, it will no longer be necessary the continuous application of coatings, since it is a solution in the medium and long term, facilitating the cleaning of the surfaces and improving the image in its assets.
